

HÀ VŨ LONG

SoftwareEngineer|JavaBackend | AI Engineering Trainee

0378071412 | Longmoon2004@gmail.com | ThạchHòa,ThạchThất,Hà Nội

GitHub: github.com/longmoon2k4 | Profile: smiledev.id.vn

PROFESSIONAL SUMMARY

Final-year SoftwareEngineering student at FPT University with a 3.2/4.0 GPA, practical experience at FPT Software, and hands-on leadership experience across software projects. Strong foundation in Java, Spring Boot, OOP, SQL, Docker, Git/GitHub and basic CI/CD, with experience leading projects involving e-commerce systems, payment integration and third-party APIs. Seeking the AI Talent Training Program – Batch V to build a strong foundation in AI and transition from software engineering into AI engineering through structured, practical training.

EDUCATION

FPTUNIVERSITY — Software Engineering

ExpectedGraduation:2027 | GPA:3.2/4.0

PROFESSIONAL EXPERIENCE

FPTSOFTWARE—AutomotiveProject (NXP)

SoftwareEngineer / ProjectMember | December2025 – February 2026

- Worked in a real-world Automotive software development environment and collaborated within an enterprise project team.
- Participated in activities related to project requirements, project specification and software testing.
- Applied Object-Oriented Programming (OOP) principles and gained practical exposure to enterprise software development workflows.

PROJECTS & LEADERSHIP

LICENSE KEY E-COMMERCE PLATFORM

ProjectLeader | Java, SpringBoot, Database, VNPay API, VirusTotal API, Docker, Git/GitHub

- Led the development of an e-commerce platform for selling and managing license keys for digital products.
- Defined project ideas, business requirements and development scope; coordinated implementation across core system components.
- Designed and implemented entities, services and core business logic using Spring Boot; configured connection to an online database.
- Integrated VNPay for online payment and VirusTotal API for file virus scanning.
- Implemented login, product detail, payment, home page and dashboards for Admin, Developer and User workflows.
- Owned delivery of major project modules including backend services, payment integration and dashboard functionality.

SBA301 — SMALL CLOTHING E-COMMERCE

ProjectLeader | Java21, SpringBoot3.4, SpringDataJPA, Spring Security, JWT, SQL Server, React, Vite, Axios, Git, Postman

- Led a group software project covering customer shopping, ordering, payment/review flows and staff/admin operations.
- Coordinated project scope and implementation tasks while contributing to backend development and system integration.
- Worked with a Spring Boot REST backend, JPA/Hibernate, SQL Server and React frontend; practiced authentication, API design and role-oriented application flows.
- Created a separate CI/CD-focused repository to practice deployment automation and DevOps workflow.

TECHNICAL SKILLS

Languages: Java, Dart Backend: Spring Boot, REST API, OOP Databases: MySQL, SQL Server (MSSQL)

DevOps: Docker, Git, GitHub, Basic CI/CD Mobile: Flutter, Dart Engineering: Requirements, Specification, Testing, SDLC

API Integration: VNPay, VirusTotal

LANGUAGES

English: Basic communication and technical reading comprehension.

Vietnamese: Native.

CERTIFICATIONS

No certifications added at this time.
